THE GDELT PROJECT

GLOBAL INSTITUTIONAL DECAY & CIVIL UNREST CONVERGE: A GEOPOLITICAL CRISIS REPORT (FEB 2026)

Amid Heightened Regional and Global Geopolitical Friction: A Day-at-a-Glance Summary

NORWAY: EPSTEIN FILE SCANDAL & DIPLOMATIC CRISIS

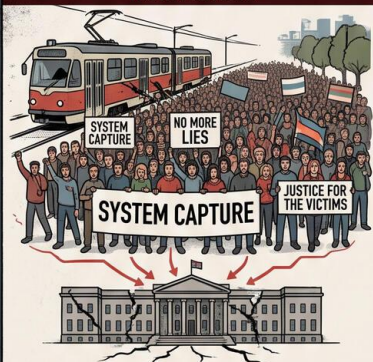

- Resurfacing of Epstein files implicates senior diplomats and royal family.
- Narrative of concealment and serious misjudgment.
- Crown Princess facing immense public pressure.

UKRAINE: ESCALATING CONFLICT & TERROR ATTACK

- Deadly terror attack in Lviv (police officer killed, dozens injured).
- Russian forces target energy infrastructure and food production (Mondeles factory).
- War exerts lethal toll on civilian infrastructure.

SARAJEVO: SYSTEMIC ANARCHY & YOUTH PROTESTS

- Fatal tram accident acts as a catalyst.
- Mass youth-led protests against political cartels and "captured" institutions.
- Prime Minister Nihad UK resigns (third time).
- Loss of faith in state capacity and judicial passivity.

SERBIA & CROATIA: REGIONAL FRAGMENTATION & RADICALIZATION

- Radicalizing agricultural protests with road blockades over low prices and uncontrolled imports.
- Breakdown in dialogue with state.
- Looming coalition collapse sparked by glorification of fascist-era symbols by MP. Political rift threatens government stability.

DEEP DIVE: TRENDS & THEMATIC CONVERGENCE

COLLAPSE OF INSTITUTIONAL TRUST

Failure of state to perform basic duties (safety, transparency). Institutions seen as "captured" by ideologically driven or corrupt elites. Public feels plundered.

WEAPONIZATION OF HISTORY & IDENTITY

Return to ethnic and historical polarization. Symbols and religious identity used to "other" groups and maintain power through fear.

HUMANITY VS. TECHNOLOGY & ECONOMIC VOLATILITY

Contrast between regression of social order and technological advancement (AI companions, disaster bots). High economic volatility, end of price controls, and inflation pressure (dairy, real estate).

FUTURE OUTLOOK & STRATEGIC RISKS (SHORT TO LONG TERM)

SHORT TERM (1-4 WEEKS)

Intensified blockades, youth protests, price shocks.

Risk

Regional Logistical Paralysis

MEDIUM TERM (1-6 MONTHS)

Coalition crises, diplomatic fallout (Norway), potential conflict escalation (Ukraine/Iran).

Escalation of Inter-Entity Conflict

LONG TERM (1-5 YEARS)

Water scarcity (Alps glacier melting), fundamental restructuring, potential state collapse or revolution (BiH).

Failure of European Fresh Water Security

TODAY'S MEDIA TRENDS

FEBRUARY 22, 2026

INSTITUTIONAL DECAY AND CIVIL
UNREST CONVERGE AMID
HEIGHTENED REGIONAL AND
GLOBAL GEOPOLITICAL FRICTION

DAY-AT-A-GLANCE

The reporting on February 22, 2026, is dominated by a profound intersection of domestic institutional failure in Bosnia and Herzegovina and escalating scandals within the European and global diplomatic arenas. In Sarajevo, a fatal tram accident has served as a catalyst for widespread youth-led protests against what is described as **systemic anarchy** and the "capture" of public institutions by political cartels. This domestic crisis, marked by the third resignation of Cantonal Prime Minister Nihad Uk, reflects a broader public loss of faith in state capacity, further exacerbated by the ending of price-control measures and perceived judicial passivity regarding political corruption. These internal vulnerabilities are occurring against a backdrop of regional instability, including **radicalizing agricultural protests** in Serbia and a looming coalition collapse in Croatia sparked by the glorification of fascist-era symbols.

Simultaneously, the global landscape is framed as a hostile threat matrix. The resurfacing of Jeffrey Epstein's files has created a **diplomatic crisis in Norway**, implicating senior diplomats and the royal family in a narrative of concealment and serious misjudgment. In Ukraine, the war continues to exert a lethal toll on civilian infrastructure, highlighted by a **deadly terror attack in Lviv** that claimed the life of a police officer and injured dozens. This convergence suggests a period of intense pressure on established leadership structures, where technological advancements like AI companions and disaster-relief robotics contrast sharply with the regression of social order and the persistence of traditional kinetic warfare.

MAJOR DEVELOPMENTS

- **Sarajevo Institutional Crisis:** Mass protests have erupted following a tram accident that killed a 22-year-old and severely injured a teenager, leading to the [resignation of Prime Minister Nihad Uk](#) and his government. The investigation is hampered by reports of [non-functional security cameras](#) that had not recorded since November, fueling accusations of criminal negligence and corruption.
- **Epstein File Scandal in Norway:** Investigative reports have exposed a [large-scale cover-up](#) involving Norwegian diplomats Rod Larsen and Mona Juul regarding their financial and personal ties to Jeffrey Epstein, with the [Norwegian Crown Princess](#) also facing immense public pressure to clarify her role.

- **Escalating Conflict in Ukraine:** A [terrorist attack at a store in Lviv](#) resulted in the death of a policewoman and 25 injuries, while Russian forces targeted energy infrastructure and a [Mondeles biscuit factory](#) in the Odesa region.
- **Serbian Agricultural Radicalization:** Farmer associations in Mrčajevci and other regions have announced the [radicalization of road blockades](#) starting Tuesday, protesting the Minister of Agriculture's failure to address low purchase prices and uncontrolled imports.
- **Croatian Political Rift:** The governing coalition in Croatia faces a crisis after video surfaced of [MP Josip Dabro singing songs](#) glorifying the Ustasha leader Ante Pavelić, prompting the HSLs party to threaten a [withdrawal from the government](#).

KEY GOVERNANCE TOPICS

Armed Conflict & Militarization

- Ukraine continues to defend against Russian incursions, with reports indicating a significant shift in [military relationships within NATO](#) as Europe increases its defense spending to achieve self-sufficiency.
- Pakistan launched [selective military operations](#) against seven camps along the Afghan border, targeting factions of the Pakistani Taliban following internal attacks.
- The US is allegedly preparing [limited strikes on Iran](#) as diplomatic efforts regarding its nuclear program stall.

Civil Unrest & Social Order

- Youth-led protests in Sarajevo are demanding a [systemic overhaul](#), specifically targeting professionalization of public companies and judicial transparency.
- In Serbia, farmers are using tractors to [block major roads](#), signaling a breakdown in dialogue between the state and the agricultural sector.
- The "One Billion Rising" campaign in Mostar highlighted [zero tolerance for violence](#) against women, framing the issue as a public rather than private crisis.

Leadership Dynamics & Governance

- The Sarajevo Cantonal government has moved into a [technical mandate](#) following the Prime Minister's resignation, with the opposition expressing skepticism that any meaningful change will occur before October elections.
- The removal of [Metropolitan Justin of Žička](#) in the Serbian Orthodox Church is being framed as a **political purge** due to his support for student protesters.
- Reports from the US characterize the Trump administration as a ["ceremonial head"](#) dominated by ideologues like Stephen Miller, struggling with a lack of traditional policy processes.

Legal Warfare & Regulatory Risk

- Rumors and reports of [Prince Andrew's arrest](#) regarding the Epstein files suggest a new phase of accountability for high-ranking UK figures.

- The [suspension of investigations](#) against Milorad Dodik and other RS leaders for "attacking the constitutional order" is criticized as a dangerous precedent of judicial submission to political power.

Climate & Extreme Weather

- Research at the [Great Barrier Reef](#) focuses on heat-tolerant "super corals" as a desperate measure against accelerating coral bleaching.
- The Alps are facing a [drastic decline in summer rainfall](#) and snow cover, threatening the fresh water reservoir for 40% of the European continent.

DEEP DIVE: TRENDS AND THEMES

The Collapse of Institutional Trust A recurring theme across multiple geographies is the failure of the state to perform its most basic duties: safety and transparency. In Sarajevo, the [tram tragedy](#) is not viewed as a freak accident but as the logical outcome of decades of patronage and technical neglect. This is echoed in Serbia, where farmers feel [plundered by a system](#) that ignores their survival in favor of "regime-friendly" associations. The narrative suggests that institutions have been "captured" by individuals who are **ideologically driven** or **financially corrupt**, leaving the general populace at risk.

The Weaponization of History and Identity Regional politics are increasingly defined by a return to ethnic and historical polarization. In Croatia, the use of [totalitarian symbols](#) at concerts is no longer an outlier but a point of government-destabilizing friction. In BiH, the [analysis of structural Islamophobia](#) highlights how religious identity is used to

deny political subjectivity to certain groups. This trend toward "othering" is framed as a deliberate strategy by elites to maintain power through fear rather than performance.

Humanity vs. Technology A striking contrast emerges between the regression of social norms and the rapid advancement of technology. While society struggles with primitive ethnic hatreds, the same cycle features the [rise of AI companions](#) for romance and [magnetic-footed robots](#) for industrial inspection. The broadcast suggests that technology is being used both as a solution for physical disasters (e.g., firefighting robots) and as a complicating factor in social truth (e.g., [AI-generated "fake" novels](#) and disinformation).

INTERNAL DYNAMICS & DOMESTIC INSTABILITY

Bosnia and Herzegovina is facing a multi-layered crisis. The Sarajevo Cantonal government's collapse occurs while the state level remains [destabilized by continuous blocks](#) of executive and legislative work by SNSD and HDZ. This paralysis is creating a **security risk** due to the potential for escalation between entity-level police structures. Public sentiment has shifted from passive discontent to [active outcry](#), particularly among the youth who view the current system as "greased" by corruption and incapable of self-reform.

Norway is grappling with a legitimacy crisis for its foreign service and monarchy. The [public expectation](#) for a statement from the Crown Princess indicates a shift in the social contract between the royalty and the citizenry, fueled by the **lack of transparency** regarding the Epstein connections.

Serbia's internal stability is threatened by a **rural-urban divide**, as the agricultural sector moves toward total road blockades, potentially paralyzing logistics and supply chains to demand attention from a government they perceive as [insulting and manipulative](#).

EXTERNAL DYNAMICS & GLOBAL POSTURE

The international system is framed as a **fracturing multipolar arena**. The US's strategic posture is portrayed as erratic, with the Trump administration's [position on Ukraine](#) described by critics as "shameful" and profit-driven, while Europe is increasingly [assuming the financial and military burden](#) of the conflict. This signals a European retreat from total reliance on the US, forcing a consolidation of its own defense strategies, as seen in [Denmark's expansion of military service](#).

Meanwhile, the framing of **global threats** is shifting from "red" (communism) to "green" (Islam) or "yellow" (China), as elites search for [new "industries of fear"](#) to mobilize their bases. This posture suggests that global statecraft is moving toward a more **transactional and defensive** model, where alliances are fragile and domestic survival dictates foreign policy maneuvers, such as the [Zelensky involvement narrative](#)

THE ECONOMIC ENVIRONMENT

The economic outlook is characterized by high volatility and the failure of government interventions. Commodity prices, particularly in the agricultural sector, are a major flashpoint, while the end of domestic price-

protection measures in BiH is set to increase consumer pressure.

- **Commodity Prices (Dairy/Wheat):** In Serbia, the state purchase price for milk has dropped to [35 dinars](#), while bread prices have risen, illustrating a total decoupling of producer costs from retail prices.
- **Inflation & Price Controls:** The ["Locked Prices" measure in FBiH](#) will end on March 1st. Previous data showed citizens saved **50 to 70 KM** per shopping trip under the scheme, suggesting a significant looming spike in the cost of living.
- **Real Estate Market:** In Sarajevo, only [1,400 apartments are currently on the market](#), far below demand, driving prices up to **3,000 KM per square meter**, pushing youth out of the urban market.
- **Corporate Logistics:** Domestic transporters in BiH are [requesting exemptions](#) from EU stay rules, as current regulations threaten the sustainability of the regional freight sector.
- **Infrastructure Debt:** The Sarajevo public transport company, GRAS, remains a leading tax debtor with [over 105 million KM owed](#) to the federation.

LEADERSHIP CHANGES

A day of high-level churn, particularly within the Bosnian government and European religious and diplomatic sectors.

- **Nihad Uk:** The Prime Minister of Sarajevo Canton [officially submitted his resignation](#) along with his entire cabinet, moving to a technical mandate to facilitate a new government formation.

- **Metropolitan Justin:** Removed from his position as Metropolitan of Žižka by the Serbian Orthodox Church's Synod, facing [criminal accusations of illegal business operations](#) following his political support for students.
- **Prince Andrew:** Facing renewed rumors and [reports of arrest](#) linked to the "Epstein file" and allegations of passing confidential government information while UK trade secretary.
- **Siniša Karan:** Took the oath as [President of Republika Srpska](#), vowing to continue the policies of Milorada Dodik.

EDITORIAL POSTURE & STORY HIERARCHY

N1BOS maintains a posture of **confrontational skepticism** toward the Sarajevo Cantonal government and the broader state apparatus. The **lead stories** are the tram accident investigation and the associated protests, framed as a "boiling point" for youth frustration. Significant airtime is given to the US Embassy's involvement in the investigation, implying that **international pressure** is the only way to ensure local accountability. The network also prioritizes investigative deep dives into foreign scandals (Epstein) to draw parallels with domestic concealment. **Buried stories** include the conclusion of the Winter Olympics, which is treated as a lighter closing segment despite the Norwegian victory. A **conspicuous omission** is any detailed response from the RS leadership regarding the suspension of the constitutional order investigation, leaving the narrative one-sided against the judiciary.

GEOPOLITICAL FRAMING

The subtext reveals a world where traditional "principled" leadership is being replaced by "eternal interests" and ideological flattery.

- **Russia:** Portrayed as an aggressor committing **acts of terror** against civilians, with a focus on its targeting of food production (Oreo factory) and energy grids (["this is a very difficult night"](#) in Lviv).
- **United States (Trump Admin):** Characterized as **incompetent and corrupt**, with a "pay-to-play" administration that has turned foreign policy into a [fundraising operation](#).
- **Bosnia and Herzegovina:** Framed as a **weak, captured state** where "professional" corruption is so deeply embedded that removing it is considered nearly impossible (["they have become professionals at corruption"](#)).
- **Norway:** Implicitly framed as **hypocritical**; while projecting an image of peace and transparency, its leaders were ["misleading committees"](#) regarding their ties to a global sex trafficker.
- **Iran:** Portrayed as **chaotic and theological**, making it an "impossible" negotiating partner, with an alternative ["new movement"](#) potentially emerging if the current regime fails to reform.

INFORMATION WARFARE ENVIRONMENT

A sophisticated meta-narrative is being constructed regarding the **"Capture of Truth."** In the Sarajevo tram case, the narrative seeding involves the [denial of ministry instructions](#) to punish protesting students, which students directly contradict.

The "missing" camera footage is presented as a **psy-op of negligence**—a deliberate attempt to hide the ground truth of the accident through administrative failure. Regionally, the [Hungarian election narrative](#) involving Zelensky is framed as a disinformation tactic by Orbán to consolidate power. The broadcast itself acts as a counter-intelligence vessel, using foreign investigative journalists to pierce the **misinformation bubble** surrounding the Epstein scandal in Scandinavia.

HYPOTHESES AND FUTURE OUTLOOK

- **The Rise of "Technocratic Populism":** As traditional parties fail, a trend is emerging where candidates like Rob Sand in Iowa or Mary Peltola in Alaska gain traction by [running against their own national brands](#). Expect more "moderate" defectors who prioritize local service over national ideological battles.
- **BiH Federal Polarization:** The resignation of the Sarajevo PM, coupled with the [judicial passivity toward RS leaders](#), will likely lead to a total breakdown in state-level cooperation, potentially triggering a call for **Bonn powers** to intervene.
- **AI-Disrupted Labor and Arts:** With AI entering the [novel publishing and companionship markets](#), expect a legislative push for "human-origin" labels and increased scrutiny on the psychological impacts of AI companionship.

STRATEGIC FORESIGHT

Short Term (1-4 Weeks): Expect [intensified road blockades in Serbia](#) that will disrupt regional food logistics. Sarajevo will see

continued youth protests, with a high risk of police clashes if "indirect threats" of school expulsions are realized. The [end of price controls](#) on March 1st will trigger immediate consumer panic and inflation spikes.

Medium Term (1-6 Months): The [Croatian coalition crisis](#) will likely lead to early elections if the HSLS follows through on its exit. The Norwegian commission investigating the Epstein files will likely result in **forced retirements** of senior diplomats. The [tomahawk delivery to Ukraine](#) will allow strikes deeper into Russia, potentially shifting the negotiation calculus.

Long Term (1-5 Years): The [glacier melting in the Alps](#) will force a fundamental restructuring of European agriculture and urban water management. The ["captured state" status of BiH](#) will lead to either a total regime collapse or a violent youth revolution, as the generation "raised in the system" refuses to accept its continuation.

RISK ASSESSMENT

- **Risk: Regional Logistical Paralysis in the Balkans.** Triggers: Radicalization of Serbian farmer blockades and failure of BiH transporters to secure EU stay exemptions. Likelihood: High. Impact: High (food shortages, price spikes). Mitigations: State-level subsidies for fuel and a temporary diplomatic waiver from the EU on the 90-day rule ([Soreko/Đurić talks](#)).
- **Risk: Escalation of Inter-Entity Conflict in BiH.** Triggers: SNSD-led blocks of security institutions and judicial failure to prosecute secessive acts. Likelihood: Moderate. Impact: Extreme (Civil War). Mitigations: Immediate [activation of Bonn powers](#) and NATO presence reinforcement.

- **Risk: Failure of European Fresh Water Security.** Triggers: Continued 2-degree warming in the Alps and exhaustion of glacier runoff. Likelihood: High (Long-term). Impact: Extreme. Mitigations: Rapid adoption of [Keyline water management systems](#) and trans-European water sharing treaties.
- **Risk: Collapse of Public Safety Confidence in Sarajevo.** Triggers: Evidence that security footage was **deliberately erased** to protect GRAS executives. Likelihood: Moderate. Impact: High (violent urban riots). Mitigations: Appointment of an [independent international investigator](#) into the tram incident.
- **Risk: Kinetic Escalation with Iran.** Triggers: Expiration of the [10-15 day UN window](#) and failure of the nuclear deal draft. Likelihood: Moderate. Impact: Global (energy crisis). Mitigations: US commitment to a "no-enrichment" but "no-strike" compromise.

GAPS & BLIND SPOTS

- The reports mention **30 witnesses** and 10 videos in the tram investigation but provide no detail on why the [forensic processing](#) of such a standard set of evidence is taking so long, suggesting a hidden barrier.
- The framing of **Russian strikes** on the Oreo factory in Odesa lacks context on the military or logistical significance of that specific site, potentially missing a narrative about targeting Western corporate interests ([Mondeles giant](#)).

- The broadcast fails to address the **Chinese reaction** to the impending US visit or the potential for a Beijing-Teheran-Moscow axis to counteract the threatened US strikes in the Middle East.
- While discussing the [Sarajevo real estate crisis](#), there is no investigation into the role of foreign capital flows or money laundering in inflating local square-meter prices.

CONTRARIAN NARRATIVE SCENARIOS

- **The Controlled Collapse:** The PM's resignation in Sarajevo is not a sign of accountability but a **strategic retreat** by the "Trojka" coalition to purge unpopular figures and regroup before the October elections, effectively "rebranding" the same political interests.
- **The Epstein Distraction:** The sudden release of files implicating Norwegian royals is a **coordinated leak** by a foreign intelligence service to destabilize NATO's northern flank at a time when Norway is increasing its strategic importance in the Arctic.
- **Black Swan Event:** A **massive cyber-attack** on the EU's new customs reform system ([Reform informa](#)) during its rollout, leading to a total halt in global parcel deliveries and a multi-billion dollar trade loss within 48 hours.

RECOMMENDATIONS & IMPLICATIONS

For Statecraft/Public Sector:

- **Security:** NATO and EUFOR must prepare for urban stabilization in Sarajevo if the current technical mandate fails to appoint a credible interior minister.
- **Economic:** The FBiH government should immediately extend [price locking measures](#) to prevent a social explosion on March 1st.
- **Diplomatic:** The UK and Norway must establish a joint **transparency tribunal** to handle the Epstein fallout before it permanently damages public trust in democratic institutions.

For Private Sector/Investors:

- **Supply Chain:** Agricultural producers in the Balkans should **diversify logistics routes** to bypass Serbia until the Mrčajevci blockade crisis is resolved.
- **Regulatory Compliance:** Companies shipping to the EU must prepare for [comprehensive daždine \(duties\)](#) on all packages regardless of value starting next year.
- **Capital Allocation:** Invest in **climatic-resilient tech**, specifically greywater recycling and Keyline irrigation systems, as alpine water scarcity becomes a permanent structural risk in Europe.

LEGISLATIVE ROUNDUP

Legislative activity is currently characterized by a disconnect between pressing social needs and **stalled state-level processes**. In BiH, critical "European laws" remain unadopted, while in Croatia and Serbia, the focus has

shifted to **punitive or protectionist** legislation.

BILLS DISCUSSED/DEBATED:

- **BiH Election Law Tech Amendment:** A bill to introduce modern technology into the voting process; tenders for equipment have been issued, but the [law itself has not been passed](#).
- **FBiH Extraordinary Price Control Law:** A proposed law to allow for price controls in [emergency circumstances](#); it has passed the first parliamentary reading.
- **EU Customs Reform:** A comprehensive overhaul of the customs system proposed by the European Commission, currently in [inter-institutional negotiations](#).
- **Croatian Symbol Ban:** A proposal to [explicitly ban communist and fascist symbols](#) within 30 days to resolve the ongoing coalition rift.

HEARINGS & PRESS EVENTS:

- **Krug 99 Session:** A regular session of intellectuals and lawmakers [denouncing the "passivization" of institutions](#) and the erosion of the constitutional order in BiH.
- **Serbian Farmer Summit:** A failed dialogue between Minister Glamočić and milk producers, ending in [mutual insults and the decision to radicalize](#) protests.
- **Lviv Municipal Statement:** Mayor Andriy Sadovi's press conference [declaring the store attack a terrorist act](#).

KEY STORIES

- **The Sarajevo Tram Tragedy and Resignation:** Following a fatal accident on February 12th involving a tram, massive youth protests have forced the [resignation of PM Nihad Uk](#). The investigation revealed that the **tram's driver cabin camera** was not functioning, and the US Embassy is now [assisting with surrounding video footage](#).
- **Norway's Epstein Scandal:** Investigative reporter Gard Oderholm details how diplomats [misled the Norwegian parliament](#) about their ties to Jeffrey Epstein, involving Rod Larsen and Mona Juul. The scandal has reached the royal palace with [Crown Princess Mette-Marit](#) under scrutiny.
- **Lviv Terror Attack:** A store in Lviv was targeted in a [coordinated explosive attack](#) after a false burglary report lured a police patrol. One officer is dead, and 25 people were injured.
- **Serbian Farmer Radicalization:** After a [hostile meeting](#) with the Agriculture Minister, producers in Mrčajevci and over 30 associations have committed to **full road blockades** starting Tuesday over low prices (35 dinars/milk) and import surges.
- **Croatian Coalition at Breaking Point:** MP Josip Dabro's [glorification of Ante Pavelić](#) has triggered a "Dabro or the Liberals" ultimatum from the HSLs, threatening the 70-seat majority of the Plenković government.
- **Prince Andrew Arrest Reports:** News from the UK indicates the [arrest of the former Prince](#) based on the "Epstein files" alleging the passing of confidential trade secrets between 2001 and 2011.
- **The Great Barrier Reef's "Super Corals":** Marine biologist Emma Camp leads an expedition to [find heat-tolerant species](#) to replant the reef, as 30-50% of live coral has already been lost.
- **Religious Persecution of Metropolitan Justin:** The removal of the [Metropolitan of Žička](#) is framed as a political act by the Serbian Orthodox Church Synod after he supported students and hosted them at the Studenica monastery.
- **Sarajevo Real Estate Crisis:** Analysis shows a [critical shortage of urban housing](#), with prices hitting 3,000 KM/sqm, making homeownership nearly impossible for the youth demographic driving current protests.
- **Pakistan-Afghanistan Border Strikes:** Pakistan [hit seven militant camps](#) in a cross-border operation targeting the Pakistani Taliban (TTP) following a series of internal terrorist incidents.
- **Closing of the Winter Olympics:** The games in Milan and Cortina d'Ampezzo conclude with [Norway as the top nation](#) (40 medals, 18 gold), while BiH achieved some of its best historical results with five representatives.
- **Rise of AI Companions:** A feature on the [AI app "Eva"](#) highlights a trend toward digital dating in NYC, raising questions about the monetization of loneliness and the future of human interaction.

ABOUT THIS REPORT

Today's Media Trends is a public interest experiment in applying deep thematic trend analysis to television news coverage from around the world to explore how responsibly applied advanced AI can help journalists and scholars better understand the overarching

trends, themes and patterns of our global world.

No data is used to train or tune any AI model.

Each morning, in collaboration with the Internet Archive's TV News Archive, we apply Google's Gemini 3 to deeply examine yesterday's coverage from each television news channel to tease out the overarching themes and trends of its news coverage into a richly annotated thematic analysis. Each high-level insight is connected back to the original broadcast, allowing journalists and scholars to understand the dominate themes and trends and instantly click out to the underlying sources for details.

By helping journalists and scholars see the broader trends and patterns of global news coverage, this analysis helps them identify

relevant stories and coverage they might not otherwise have encountered and uncover connections, emphases and narrative shifts that enable more comprehensive reporting and deeper, evidence-based research.

This report is entirely machine generated using Gemini 3 and may include errors and omissions. Please verify all findings. No data is used to train or tune any AI model.
