THE GDELT PROJECT

TODAYS TRENDS ON CAPITOL HILL

NOVEMBER 14, 2026

THE UNITED STATES FACES A SYSTEMIC CRISIS OF GOVERNANCE AS A NATIONWIDE AVIATION GROUND STOP, INTENSIFYING GLOBAL CONFLICTS, AND A MASSIVE CORPORATE ESPIONAGE SCANDAL OVERSHADOW A DECISIVE DEMOCRATIC MIDTERM VICTORY

DAY-AT-A-GLANCE

The national discourse on November 14, 2026, is dominated by the fallout of the 2026 midterm elections, which saw a **decisive Democratic "Blue Wave"** that repudiated the incumbent administration's policies. While Democrats prepare to take control of both the House and the Senate, the governing capacity of the United States has been thrown into immediate crisis by a **nationwide aviation ground stop** that halted over 3,500 aircraft due to a legacy systems failure during a fiber-optic migration. The administration is currently leveraging this infrastructure collapse to demand an emergency $50 billion "builder" budget, framing the disaster as a symptom of decades of underinvestment rather than immediate oversight failure. This domestic instability coincides with a massive **espionage scandal involving Nvidia CEO Jensen Huang**, who is accused of an affair with a suspected Chinese agent, raising existential threats to U.S. tech sovereignty and national security.

Simultaneously, the geopolitical environment is rapidly deteriorating. In Ukraine, the acting head of mission revealed critical technical vulnerabilities in **Starshield drone operations**, where systemic speed limits have rendered interceptors ineffective against new Russian jet-powered drones. Meanwhile, the administration's "victory" in an **unauthorized war in Iran** is being fiercely contested by a newly empowered Democratic caucus, which labels the conflict an illegal "war of choice" and demands a full funding withdrawal. These disparate crises—aviation, technology, and warfare—are converging to test the resilience of American institutions as the nation approaches its 250th anniversary, with the public and political elites increasingly divided over whether the current "Red Pill" populist environment can sustain a functional republic.

MAJOR DEVELOPMENTS

- **Democratic Midterm Resurgence and Leadership Shifts:** Democrats secured a historic majority in the House and Senate, driven by a 27% youth turnout and a shift in rural counties. Senate leadership is now a site of intense friction as Senator Chris Van Hollen challenges Chuck Schumer for the Majority Leader position, campaigning on a platform of economic populism and an end to the filibuster.

- **Nationwide FAA Ground Stop:** A contractor error by L3-Harris during a TDM-to-fiber migration triggered a total stop of U.S. air traffic, leaving 12,000 flights displaced and exposing the extreme fragility of 1980s-era analog telecommunications still powering the national airspace.
- **Nvidia Espionage Scandal:** Allegations have surfaced that Nvidia CEO Jensen Huang was involved with a Chinese operative, Alice Huang, in a "honeypot" operation. The scandal has led to calls for immediate Congressional investigations into Treasury Secretary Bessent and the Commerce Department for potentially facilitating the leak of H100 chip technology to Beijing.
- **Ukraine Tech and Munition Crisis:** Ukraine reports a **systemic restriction on Starshield drone technology** that caps speeds at 160km/h, preventing the interception of Russian assets, while a severe shortage of Patriot interceptors is forcing Kyiv to prioritize targets amidst devastating strikes on energy infrastructure.
- **Iran War Accountability:** High-ranking Democrats and the Democratic Veterans Caucus have labeled the ongoing conflict in Iran as an illegal war of choice, citing 21 KIA and massive domestic economic fallout, while the President continues to claim a total victory that the public appears to have rejected at the polls.

KEY GOVERNANCE TOPICS

Critical Infrastructure Security

- The FAA ground stop exposed that **70% of the FAA's copper lines** have transitioned to fiber, but the remaining analog legacy systems are prone to catastrophic failure during updates. Secretary Sean Duffy has requested $50 billion to build a state-of-the-art system, admitting current FAA towers are nearly 100 years old.
- Public skepticism remains high regarding the "contractor error" explanation, with callers and analysts questioning if a cyber attack or foreign interference was the true root cause, despite official denials from DHS.

Tech Sovereignty & AI

- The "Nvidia Scandal" is being characterized as a **Watergate-level event** for the tech industry, with claims that the administration failed to implement export controls on AI chips. Punditry suggests that the Chinese Communist Party is engaging in active sabotage of the AI race through high-level infiltration.
- Growing domestic concern over **AI data centers** highlights their massive consumption of power and water, with some voters shifting their support based on proximity to these facilities.

Armed Conflict & Militarization

- The U.S. military posture in Iran is under threat of defunding. Incoming Democratic leaders have pledged to use the power of the purse to end the conflict, which they argue is driving record-high grocery and gas prices.

- In Ukraine, the war has transformed into a high-speed drone race. Ukraine is now producing 4 million drones annually, but remains tethered to Western satellite and interceptor supply chains that are failing to meet current demand.

Legal Warfare & Regulatory Risk

- The Supreme Court is weighing a landmark case on whether the Labor Department has the power to administratively penalize farms for H2-A visa violations without a jury trial, a decision that could strip regulatory agencies of their enforcement "teeth."
- The Department of Justice faces internal turmoil as critics and former officials like Eric Slavin describe a **"chilling effect"** on reporting and independence, with claims the Pentagon is censoring military-focused news outlets like Stars and Stripes.

DEEP DIVE: TRENDS AND THEMES

The End of "Militant Populism" and the Rise of "Economic Populism" The 2026 midterms signify a pivot away from the MAGA-style populism of the executive toward a **Democratic economic populism**. This new narrative, championed by figures like Ro Khanna and Chris Van Hollen, focuses on the "broken basic American contract." They are successfully linking foreign "wars of choice" and corporate greed (Nvidia, Big Tech) to the kitchen-table issues of inflation and the high cost of living. This trend suggests that the next two years will see a sustained legislative assault on billionaire wealth and corporate influence in Washington.

Institutional Decay vs. "The Builder" Defense A recurring theme is the **physical and digital rot** of American systems. From the FAA's century-old towers to the VA's 40-year-old "COBOL" health records system, the nation is struggling with obsolescence. The administration's defense is the "Builder President" narrative, which argues that failure is inevitable without massive, non-partisan capital injections. However, the opposition frames this same failure as **incompetence and misplaced priorities**, specifically citing the prioritization of "ballrooms and nonsense" over critical infrastructure.

The Vulnerability of Hybrid Warfare The reliance on private contractors (L3-Harris, SpaceX) for national security functions has created a new **theatre of vulnerability**. Whether it is a contractor's "fiber glitch" grounding national air traffic or SpaceX capping drone speeds in a combat zone, the U.S. and its allies are finding themselves at the mercy of corporate parameters. This theme is driving a push for **tech sovereignty** and more direct state control over "Starshield" and AI production.

INTERNAL DYNAMICS & DOMESTIC INSTABILITY

The United States is currently experiencing a **crisis of legitimacy** following the midterms. While the "Blue Wave" provided a mandate for change, the executive branch is doubling down on its "victory" narrative in Iran, creating a dangerous disconnect between the government's stated reality and the voters' lived experience. Polling indicates that 50% of registered voters wanted "total upheaval" of the government, suggesting that even the Democratic win is a plea for radical systemic change rather than a return to the status quo.

Elite infighting is particularly acute within the Democratic Party. The challenge to Senator

Schumer by Senator Van Hollen is not merely a personnel change but a **clash of ideological eras**. Van Hollen's move to abolish the filibuster and his open defiance of the party establishment reflect a broader trend of "insurgent" politics becoming the mainstream. This internal instability is likely to hamper the party's ability to present a unified front as they attempt to dismantle the current administration's "war cabinet" and address the Nvidia scandal.

EXTERNAL DYNAMICS & GLOBAL POSTURE

The U.S. global posture is shifting from one of dominance to one of **reactive defensiveness**. The administration's framing of a "total victory" in Iran is undermined by the Democratic caucus's pledge to defund the war, signaling to allies and adversaries that American military commitments are increasingly subject to domestic political volatility. In the Indo-Pacific, the Nvidia scandal has forced the U.S. into an **emergency defensive stance** regarding chip technology, with the Commerce Department effectively under investigation for its own export failures.

In Europe, the **Ukraine conflict has entered a "technological stalemate."** Despite Kyiv producing 4 million drones, the U.S. and its partners are failing to provide the specific high-tech interceptors (PAC-3) needed to counter Russia's evolved jet-powered assets. The revelation that no PAC-3 missiles will be delivered before 2030 highlights a profound disconnect between diplomatic promises and industrial reality, potentially forcing Ukraine into a negotiated settlement the U.S. officially opposes.

THE ECONOMIC ENVIRONMENT

The American economy is characterized by **intense stagflationary pressure** driven by the Iran conflict and trade tariffs. While the administration points to job growth in the manufacturing sector, voters are overwhelmingly focused on the "affordability crisis" and the rising cost of groceries, gas, and housing. The markets are currently pricing in significant regulatory risk following the Nvidia scandal and the potential for a Democrat-led effort to tax the "billionaire class" at significantly higher rates.

- **Inflation/CPI:** For the first time in 105 years, the BLS failed to state the 12-month CPI due to lack of provisions during a previous shutdown.
- **Commodities:** Gold has fallen under **$4,000**, while oil prices remain volatile due to the "Iran Terror Premium" estimated at $3-$4 per barrel.
- **Supply Chain:** The FAA ground stop caused a **cascading disruption** that will take days to clear, impacting critical medical and perishable supply lines.
- **Corporate Risk:** Nvidia (NVDA) faces an existential regulatory threat; **L3-Harris (LHX)** is under intense scrutiny for the aviation outage.

LEADERSHIP CHANGES

The political landscape is undergoing a **rapid generational and ideological turnover**, as the midterm results have empowered a more aggressive, progressive-populist wing of the

Democratic Party and forced a retreat by MAGA-aligned figures.

- **Hakeem Jeffries:** Positioned to become the first Black Speaker of the House, signaling a move toward "accountability agendas."
- **Chris Van Hollen:** Launched a direct challenge to Chuck Schumer for Senate Majority Leader, representing the party's populist pivot.
- **Jensen Huang:** The Nvidia CEO is the "loser" of the day, facing immediate subpoenas and public condemnation over espionage allegations.
- **Stephen Miller:** Appointed as **White House Chief of Staff**, a move that Bacon and other moderates call a "mistake" that will accelerate the administration's "drive off a cliff."
- **Pete Hegseth:** Survived an impeachment attempt but faces a "third time" effort by the new Congress, which intends to remove him for "extrajudicial killings" and war conduct.

EDITORIAL POSTURE & STORY HIERARCHY

C-SPAN's editorial posture on November 14 is **performatively nationalistic**, heavily saturated with Veteran's Day ceremonies and "America 250" historical retrospectives. This serves as a **narrative buffer** against the chaotic news of the FAA ground stop and the Nvidia scandal. The lead stories are the aviation collapse and the midterm fallout, but they are frequently interrupted by lengthy, soothing patriotic content. The **Nvidia/Huang scandal is being "buried" or framed as a purely partisan investigation** in some segments, while the **Iran war's legality** is given significant airtime through the Democratic Veterans Caucus, suggesting a shift toward an anti-war editorial slant. A **conspicuous omission** is any detailed discussion of the **Venezuelan government takeover** mentioned in passing by callers, or the specific status of the "millions" of deportees the administration claims to have processed.

GEOPOLITICAL FRAMING

The day's framing presents a world in **technological and moral flux**, where traditional alliances are strained by private sector failure and aggressive Chinese intelligence operations.

COUNTRIES

- **Ukraine:** Portrayed as a **valiant but technologically throttled friend**. The mission head describes an "existential fight" being hampered by Western technical caps on Starshield drones and interceptor shortages ("Russia producers missiles... Ukraine produces drones").
- **China:** Framed as an **omnipresent, predatory foe** that has successfully infiltrated the highest levels of U.S. tech (Nvidia) and is weaponizing global supply chains to "cheat" the U.S. in the AI race ("China is the poster child for that... they will weaponize their supply chains").
- **Iran:** Depicted by the administration as a **defeated adversary**, but by the new Congressional majority as a **victim of an illegal U.S. war of choice** that has destabilized global energy markets.

- **Nigeria:** Portrayed as a **failed state in denial**, where the government ignores the "genocidal" massacre of Christians to maintain a facade of stability ("culture of denial leads to a cultural culture of violence").

LEADERS

- **The U.S. President:** Framed by supporters as a **"Builder" and a wartime victor**, but by detractors and midterm voters as an **incompetent narcissist** presiding over a crumbling state ("the President is a narcissist who's obsessed with himself").
- **Jensen Huang:** Portrayed as either a **brilliant visionary compromised by a "honeypot"** or a corrupt executive who facilitated a **"national security threat"** for personal gain.
- **Volodymyr Zelenskyy:** Implicitly characterized as **desperate and increasingly frustrated** with Western delays, now reaching out directly to European leaders to "collect single numbers" of missiles ("my President personally calls European leaders... collectors... piece by piece").

NON-STATE & CORPORATE ACTORS

- **SpaceX/Starshield:** Framed as a **fickle and unreliable partner** that is arbitrarily "systematically restricting" capabilities in a war zone, prompting calls for state-owned alternatives.
- **L3-Harris:** Depicted as an **inept monopoly** whose "fiber glitch" cost the U.S. economy billions, though the administration is protecting them to secure future infrastructure funding.
- **Fulani Militants:** Characterized as a **radicalized, decentralized genocidal force** that is methodically "cleansing" Nigeria's Middle Belt with government complicity ("cleansing of the land to eradicate the Christian presence").

INFORMATION WARFARE ENVIRONMENT

The primary information battle is over the **causality of the FAA ground stop**. The administration is engaging in **"Narrative Seeding,"** immediately pivoting from the failure itself to the "investment gap," attempting to preempt investigations into contractor incompetence or cyber-sabotage by framing the event as an inevitable "National Emergency." This is a classic **psy-op tactic** to redirect public anger toward a specific legislative goal ($50B modernization).

Conversely, the Democratic opposition is using **"Accountability Seeding"** regarding the Nvidia scandal. By leaking details of the "honeypot" and the suspected affair, they are creating a **"meta-narrative" of corruption** that links the administration's trade policy to Chinese espionage. The delta between media "spin" and ground truth is widest in the **Iran war coverage**, where the administration's claim of "total victory" is being systematically dismantled by veteran groups who describe a **"reckless and illegal war"** with no clear exit strategy ("Pete Hegseth started a war of choice... making our military... less safe").

HYPOTHESES AND FUTURE OUTLOOK

- **Legislative Gridlock:** The incoming Democratic Congress will likely **refuse to pass the $50 billion FAA budget** unless it is tied to massive oversight and a repeal of current trade/war policies, leading to a prolonged funding battle as infrastructure continues to fail.
- **Nvidia Decoupling:** The Huang scandal will force a **forced divestment or nationalization** of certain AI assets, as the "national security threat" becomes too great for any administration to ignore, potentially triggering a massive tech market correction.
- **Ukraine Conflict Shift:** With Starshield capped and PAC-3 missiles years away, Ukraine will likely begin **asymmetric strikes deep into Russian energy infrastructure** as a desperation move, potentially escalating the conflict before the new U.S. Congress can take office.
- **Iran Withdrawal:** A "poison pill" in the upcoming defense authorization will likely **mandate a U.S. withdrawal from Iran**, which the President will veto, leading to the first major constitutional crisis of the 120th Congress.

STRATEGIC FORESIGHT

Short Term (1-4 Weeks):

- Intense FAA oversight hearings and potential **debarment of L3-Harris** from government contracts.
- Public **deposition of Jensen Huang** and possible resignation from Nvidia.
- Social unrest driven by high gas prices and the perception of an "illegal" ongoing war.

Medium Term (1-6 Months):

- The **abolition of the Senate filibuster** under a Van Hollen leadership, allowing the passage of the Women's Health Protection Act and a federal stock ban.
- A major **re-alignment of the U.S. defense industrial base** to reduce reliance on single-provider contractors like SpaceX.

Long Term (1-5 Years):

- The "America 250" milestone becomes a **point of constitutional re-founding**, with a national move toward a popular vote for the presidency and the potential admission of D.C. and Puerto Rico as states to preserve Democratic power.
- Permanent **structural changes to global chip supply chains**, with the U.S. moving toward a "Fortress Technology" model of total isolation from Chinese influence.

RISK ASSESSMENT

The current operating environment is characterized by high-impact, systemic risks that are poorly mitigated by a fractured government.

- **Aviation Infrastructure Collapse:** Triggers: A second fiber-migration failure or a targeted cyber attack on the remaining 30% copper lines. Likelihood: Moderate. Impact: Critical—total economic paralysis. Mitigations: Immediate emergency funding and diversification of contractors beyond L3-Harris.

- **AI Tech Seizure by Beijing:** Triggers: Successful exfiltration of H100 architecture through the Jensen Huang/Alice Huang link. Likelihood: High. Impact: Existential—loss of U.S. strategic edge in autonomous weapons and intelligence. Mitigations: Federalizing Nvidia's national security sensitive divisions.
- **Iran War Contagion:** Triggers: An Iranian retaliation against U.S. assets in the Strait of Hormuz during the leadership vacuum. Likelihood: Moderate. Impact: High—global energy shock. Mitigations: Fast-track diplomatic cease-fire through bipartisan Congressional intervention.
- **Ukraine Strategic Failure:** Triggers: Starshield limitations remaining in place while Russia deploys jet drones. Likelihood: High. Impact: High—collapse of the Ukrainian front. Mitigations: Forcing SpaceX to lift speed caps or deploying military-grade U.S. satellite backup.
- **Nigeria Middle Belt Genocide:** Triggers: Escalation of Fulani militant raids during the 2027 Nigerian presidential elections. Likelihood: High. Impact: High—humanitarian catastrophe and regional destabilization. Mitigations: Maintaining the Country of Particular Concern (CPC) designation and linking military aid to protection metrics.

GAPS & BLIND SPOTS

- The specific **nature of the "Starshield speed limit"** is left unexplained; it is unclear if this is a technical glitch, a contractual dispute, or a deliberate geopolitical choice by Elon Musk.
- There is no discussion of the **U.S. casualty counts in Iran** beyond a few mentions of "21 KIA," despite claims of a "total victory."
- The broadcasts fail to detail the **legal status of Alice Huang**—is she in custody, or has she already fled to China?
- There is a complete lack of reporting on the **economic cost of the Venezuela takeover** and its impact on the $3 trillion tariff revenue goal.

CONTRARIAN NARRATIVE SCENARIOS

The "Managed Crisis" Hypothesis: The FAA ground stop was not a contractor error, but a **deliberate stress test or "false flag" infrastructure failure** engineered by the administration to force the $50 billion budget through a hostile, lame-duck Congress. This would explain the immediate, polished pivot to a funding request.

The "Nvidia Diversion": The Huang scandal is a **coordinated leak by the administration** to blame the private sector for a tech-sharing policy they themselves approved. By making Huang the villain, the Treasury and Commerce Departments avoid accountability for their failure to regulate the H100 exports.

Black Swan Event: The "Starshield Strike": SpaceX **completely shuts down Starshield connectivity** for the Ukrainian military in response to threatened U.S. nationalization or regulation, leading to an immediate and total Ukrainian collapse on the front lines.

RECOMMENDATIONS & IMPLICATIONS

For Statecraft/Public Sector:

- **Security:** Immediately **federalize or audit** all private-sector satellite communications used in active war zones (Starshield) to ensure foreign policy goals are not subverted by corporate CEOs.
- **Economic:** Prepare for an **emergency interest rate hike** if the Iran war continues to drive energy prices, as core inflation is becoming unmoored from headline projections.
- **Diplomatic:** Re-examine the **Nigerian "denial" culture** and move toward direct sanctions on Nigerian officials who refuse to prosecute Fulani militants.

For Private Sector/Investors:

- **Supply Chains:** Pivot away from reliance on L3-Harris and other "legacy hardware" providers in the aviation and defense sectors; **diversify logistics** to account for recurring infrastructure "glitches."
- **Regulatory Compliance:** Tech firms must prepare for a **radical increase in "Know Your Employee" (KYE)** and counter-intelligence standards following the Nvidia scandal.
- **Capital Allocation:** Shift investments toward **domestic "sovereign" AI and energy-independent data centers**, as public sentiment is turning sharply against "Big Tech" resource consumption.

LEGISLATIVE ROUNDUP

The legislative environment is defined by the 120th Congress's preparation for an "accountability sweep," targeting the executive's war powers and corporate tech influence.

BILLS DISCUSSED/DEBATED:

- **Women's Health Protection Act:** A priority for the new Congress to codify abortion rights federally.
- **SHOCK Act (Stock Ban):** Aimed at banning members of Congress from trading stocks to eliminate "dark money" influence.
- **Working Families Tax Cut Act:** A $12.5 billion package currently being used to fund FAA "down payments."
- **PRO Act:** Designed to empower labor unions, which Senator Van Hollen argues never got a floor vote due to Schumer's leadership.
- **Dignity Act:** A bipartisan immigration bill (Salazar-Garcia) that moderates hope can provide an alternative to mass deportations.

HEARINGS & PRESS EVENTS:

- **FAA Ground Stop Briefing:** Secretary Sean Duffy defends the ground stop as a "safety first" measure and requests $50 billion for legacy system replacement.
- **Senate Commerce/NASA/FCC Nominee Hearing:** Intense questioning of Danielle Sievers and Leslie Becerra over FCC independence and NASA PH.D. workforce losses.
- **Persecution of Christians in Nigeria:** House subcommittee hearing exposing the 161% increase in violence in Plateau State.
- **Sports Betting on College Campuses:** Witness testimony regarding player harassment and the 60% of students engaging in problem gambling.

KEY STORIES

- **The Great Aviation Halt of 2026:** A nationwide FAA ground stop involving 3,500 planes sparked by an L3-Harris fiber-optic migration error. 12,000 flights were delayed, and the administration used the event to request $50 billion in modernization funds.
- **Nvidia "Honeypot" Investigation:** Incoming Speaker Hakeem Jeffries and Rep. Jamie Raskin announce subpoenas for Nvidia over CEO Jensen Huang's alleged affair with a suspected Chinese spy, which likely compromised H100 chip technology.
- **The Van Hollen Challenge:** Senator Chris Van Hollen of Maryland officially runs for Senate Majority Leader against Chuck Schumer, promising to end the filibuster and push an aggressive "Economic Populist" agenda.
- **Ukraine's Starshield Speed Limit:** Acting mission head Denis Sinek reports a 160km/h cap on Starshield drone technology that is preventing the interception of Russian jet drones, alongside a critical shortage of Patriot missiles until 2030.
- **Operation Tornado Triumphs:** Attorney General Todd Blanche announces 354 arrests worldwide and the seizure of 5.7 metric tons of drugs in a massive crackdown on dark-web narcotics trafficking.
- **The Nigeria Christian Massacre Report:** NGO witnesses testify that 1968 Christians were killed in 2026 in the Middle Belt alone, while the Nigerian government attempts to frame the violence as a simple "farmer-herder" dispute.
- **Democratic Veterans Caucus Denounces Iran War:** Rep. Seth Moulton and others lead a caucus demanding an end to the "illegal" war in Iran, citing 21 U.S. service members killed and record gas prices for American families.
- **Ibogaine Research for PTSD:** HHS Secretary Kennedy and Mark Cuban announce investments in Ibogaine and psychedelic research to treat the estimated 14 million Americans suffering from severe mental illness and PTSD.
- **The 250th Anniversary "America 250" Launch:** Veteran's Day ceremonies at the Vietnam Wall, Battleship Missouri, and the National Cathedral kick off the two-year countdown to the nation's 250th birthday, focusing on "patriotism and purpose" amidst current divisions.
- **Supreme Court Labor Authority Test:** The court hears arguments in a case that could eliminate administrative fines for employers, potentially moving all labor enforcement to Article III courts.
- **College Sports Betting Crisis:** Hearing reveals aggressive harassment of student athletes by bettors and a massive surge in gambling among 18-29 year olds on campus.

ABOUT THIS REPORT

Today's Trends On Capitol Hill is a public interest experiment in applying deep trend analysis to the daily business of the United States Congress to explore how responsibly applied advanced AI can help journalists, scholars and Congressional staff better understand the overarching legislative trends, themes and patterns of Congress.

No data is used to train or tune any AI model.

Each morning, we apply Google's Gemini 3 to deeply examine yesterday's Congressional activity to tease out its overarching themes and trends into a richly annotated thematic analysis. Each high-level insight is connected back to the original source material, allowing journalists and scholars to understand the legislative themes and trends and instantly click out to the underlying sources for details.

This inaugural report is based on deep analysis of CSPAN, CSPAN2 and CSPAN3 coverage in collaboration with the Internet Archive's TV News Archive. It is currently limited to the Congressional business covered on those three CSPAN channels and thus may not include all major Congressional business, may include activity from previous days that aired on a later date, and/or may include other major federal, state and local governmental business. We will continue to refine this report to incorporate a growing array of Congressional information sources. This report is entirely machine generated using Gemini 3 and may include errors and omissions. Please verify all findings. No data is used to train or tune any AI model.

For questions or suggestions, please contact kalev.leetaru5@gmail.com.
